

CERTIFICATE OF SMART CONTRACT AUDIT

Based on the information provided by Subtopia, Entersoft has conducted an exhaustive Smart Contract Audit focusing on Static and Dynamic testing techniques for the smart contracts in scope. During this engagement Entersoft has found Subtopia to be secure and compliant to with recognized industry standards, notably OWASP, NIST SP 800 (encryptions & signatures), Algorand & Pyteal security guidelines for their smart contracts.

Entersoft recognises Subtopia for its efforts to reduce security threats and maintain rigorous security standards of their smart contracts. In order to maintain this certificate, any changes or new additions made to any of the contracts in scope must pass regular Smart Contract Audits.

Entersoft confirms that any identified vulnerabilities as a result of the engagement performed in December 2023 have been remediated by Subtopia and retested by Entersoft.

Scan Passing Month: December 2023

A handwritten signature in black ink, appearing to read "PKang", written over a horizontal line.
